

### Purpose of form

Form 04FE006E, Developmental Behavioral Checklist, is used to help the emergency foster home provider briefly identify the child's abilities and behaviors throughout placement. This form is not limited to the behaviors listed. It assists in identifying strengths and needs the child has and in documenting behaviors that have been observed.

### Instructions

The emergency foster home provider prepares Form 04FE006E in triplicate. The form is completed initially within 48 hours of placement and updated as appropriate, at least weekly.

**Child's name, date of birth, and case number:** Self-explanatory.

When the initial checklist is completed within 48 hours, the provider may not be able to determine if a particular behavior is appropriate. As the skills or behaviors are recognized, the appropriate line is checked and the date is shown.

**Comments:** The provider identifies any behavior or skill strengths, needs, or concerns that have been observed or documented by professionals, including any not on the checklist.

### Routing

Both the original and one copy are given to the CW worker upon the child's discharge. The original is filed in the CW case and the copy accompanies the child to the next placement.

A copy is retained in the contractor's file for the child.
