

Proposed Revisions to Appendix C-4, Child Care Eligibility/Copayment Chart

- Maintain family share copayments (not per child)
- Scale based on family size and household income (remove number of children in care). This will significantly reduce copayments for families with over one child in subsidized care.
- Copayments calculated in 5 percent increments of State Median Income (SMI) (reduces the number of copayment bands from 37 to 11)
- Copayments at highest amount are not to exceed 7 percent of household income (federally recommended level)
- Families who currently receive subsidy will not see a copay increase; most will see a decrease
- Upper limit family size on chart will be “10 or more”
- Zero copayment for families below the federal poverty line
- Eligibility set at 85 percent of SMI (Federal maximum). This will allow more families to initially qualify for subsidized care.

Projected Effective Date: Spring 2019

Schedule 1.A. Entry Threshold and Schedule of Family Share Copayments for Households Sizes of One to Five

Adjusted Monthly Income (AMI): Gross earned income plus unearned income, minus legally-binding child support paid, rounded to the nearest dollar. Note: Reverse printed numbers represent Federal Poverty Level (FPL).

Family Share Co-payments (FSCP): Based on the number of people in household and percentage of state median income (SMI) as determined by the federal Office of Community Services, Administration for Children & Families. Households at or below the Federal Poverty Level (FPL) are deemed to have no FSCP for subsidized child care; households between the FPL and 85% of SMI are assigned a FSCP at 7% of their AMI.
